FOUNDATION

YESSENOV
DATA LAB

June 17 –
July 13

Almaty 2024

Contents

- What is Yessenov Data Lab 2024 Summer School?
- Training Program:
 - ▶ Week 1 Python for Data
 - ▶ Week 2. Regression and Analysis
 - ▶ Week 3. Data Classification
 - ▶ Week 4. Deep Learning and Computer Vision

What is Yessenov Data Lab 2024 Summer School?

Yessenov Data Lab Summer School 2024 is a 4-week intensive course.
3 weeks of online training,
1 week of offline training (in Almaty).

Dates: June 17 – July 13, 2024

A 4-WEEK SCHOOL GIVES YOU THE OPPORTUNITY TO:

- learn big data analysis skills that you can apply in practice;
- communicate with lecturers, ask your questions;
- meet like-minded people and build new connections.

In addition to the YDL School certificate, excellent students will also receive an academic transcript/certificate from AlmaU, equivalent to a certificate of advanced training, which counts towards the students' training.

- The Foundation covers return tickets, food and accommodation expenses for the winners of the Yessenov Data Lab contest who come to Almaty from other regions from July 8 to July 13. The School participants are provided with food during the offline training.

Online

Training Program

Lecturer:

Timur Bakibayev

Ph.D. in Computer Science, Professor at AlmaU

Week 1. Python for Data

Objective: to learn the basics of the Python programming language for data analysis

Day 1 Artificial Intelligence and Work with ChatGPT

- 10:00 – 10:10 Opening of the Summer School. Welcome Message
- 10:10 – 11:30 What is Artificial Intelligence
- 11:45 – 13:15 ChatGPT Principles
- 14:30 – 16:00 Laboratory Work with ChatGPT API
- 16:15 – 18:00 Laboratory Works' Analysis

Day 2 Working with Data

- 10:00 – 11:30 NumPy and Pandas Libraries' Review
- 11:45 – 13:15 Data Grouping. Filters, Sorting
- 14:30 – 16:00 Laboratory Work with Pandas
- 16:15 – 18:00 Laboratory Works' Analysis

Day 3 Data Visualization

- 10:00 – 11:30 Matplotlib Review
- 11:45 – 13:15 Seaborn Library Review
- 14:30 – 16:00 Laboratory Work: Visualization
- 16:15 – 18:00 Laboratory Works' Analysis

Day 4 Basic Forecasting

- 10:00 – 11:30 Regression Problem Review
- 11:45 – 13:15 Feature Importance in Model Building
- 14:30 – 16:00 Laboratory Work: Analysis and Data Preprocessing
- 16:00 – 17:00 Laboratory Works' Analysis
- 17:00 – 18:00 Motivational Meeting

Day 5 StreamLit: The Web of Data

- 10:00 – 11:30 Streamlit Review
- 11:45 – 13:15 Laboratory Work: Streamlit
- 14:30 – 16:00 Laboratory Work: Streamlit
- 16:00 – 18:00 Streamlit Deployment

Training Program

Lecturer:

Kirill Yakunin

Ph.D. in Computing Systems and Software,
ML Engineer at Metaculus

Week 2. Regression and Analysis

Objective: Mastering the Theory and Skills of Statistical Analysis;
Building Predictive Regression Models

Day 1 Statistical Analysis

10:00 – 11:30	Intelligence Analysis, Histograms, Outliers, Distributions, Correlation Analysis
11:45 – 13:15	Hypothesis Testing. One-sample Test. Two-sample Test
14:30 – 16:00	Laboratory Work
16:15 – 18:00	Laboratory Work. Discussion

Day 2 Regression Modelling P.1

10:00 – 11:30	Linear Regression Basics. Metrics. Data Verification.
11:45 – 13:15	Data Preprocessing
14:30 – 16:00	Laboratory Work
16:15 – 18:00	Laboratory Work. Discussion

Day 3 Regression Modelling P.2

10:00 – 11:30	Polynomial Regression. Regularization of Regression Models
11:45 – 13:15	Gradient Descent
14:30 – 16:00	Laboratory Work
16:15 – 18:00	Laboratory Work. Discussion

Day 4 Unsupervised Learning

10:00 – 11:30	Feature Importance
11:45 – 13:15	Unsupervised Learning. Dimensionality Reduction
14:30 – 16:00	Laboratory Work
16:00 – 17:00	Laboratory Work. Discussion
17:00 – 18:00	Motivational Meeting

Day 5 Project on Regression Modelling

10:00 – 11:30	Complete Machine Learning Project
11:45 – 13:15	Q&A
14:30 – 16:00	Project Defence
16:15 – 18:00	Project Defence and Discussion of the Results

Online

Training Program

Lecturer:

Kuanysh Abeshev

Ph.D. in Mathematics,
Dean of the School of Digital Technologies,
AlmaU

Week 3. Data Classification

Objective: building predictive data classification models

Day 1 Performance Evaluation - Classification

- 10:00 – 11:30 Metrics for Classification Problems
- 11:45 – 13:15 Logistic Regression (Binary and Multi-Class)
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Works' Analysis. Distribution of Datasets for the Project Defence

Day 2 Instance-based Learning. Probabilistic Classification

- 10:00 – 11:30 K-nearest Neighbors (KNN) Method
- 11:45 – 13:15 Naive Bayes Classifier
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Works' Analysis

Day 3 Kernel-Based Models

- 10:00 – 11:30 Support Vector Machines (SVM) – Classification
- 11:45 – 13:15 Support Vector Machines (SVM) - Regression
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Works' Analysis

Day 4 Tree-Based Models

- 10:00 – 11:30 Decision Tree
- 11:45 – 13:15 Ensemble Methods and Random Forests
- 14:30 – 16:00 Laboratory Work
- 16:00 – 17:00 Laboratory Works' Analysis
- 17:00 – 18:00 Motivational Meeting

Day 5 Classification Project

- 10:00 – 11:30 Principal Component Analysis (PCA)
- 11:45 – 13:15 Laboratory Work
- 14:30 – 16:00 Project Implementation
- 16:15 – 18:00 Presentation and Defence of the Project

Offline Almaty

Training Program

Lecturer:

Vlad Yushchenko

M.Sc. Computer Science,
Sr. Machine Learning Engineer
at Cape Analytics

Week 4. Deep Learning and Computer Vision

Objective: mastering deep learning methods and neural networks

Day 1 Deep Learning (MLP, ANN)

- 10:00 – 11:30 Introduction to Neural Networks. Multilayer Perceptron
- 11:45 – 13:15 Backpropagation Algorithm
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Work. Discussion

Day 2 Deep Learning with PyTorch

- 10:00 – 11:30 Introduction to PyTorch Library
- 11:45 – 13:15 Convolutional Neural Networks (CNN). Image Classification. Metrics
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Work. Discussion

Day 3 Deep Learning on Image Data. Segmentation

- 10:00 – 11:30 Image Segmentation Models. Data Preparation
- 11:45 – 13:15 Image Segmentation Models. Model Building, Training, Quality Metrics
- 14:30 – 16:00 Laboratory Work
- 16:15 – 18:00 Laboratory Work. Discussion

Day 4 Deep Learning on Image Data. Object Detection

- 10:00 – 11:30 Object Detection Models on Images. Data Preparation
- 11:45 – 13:15 Model Building, Training, Quality Metrics
- 14:30 – 16:00 Laboratory Work
- 16:00 – 18:00 Laboratory Work. Discussion

Day 5 Introduction to MLOps

- 10:00 – 11:30 Introduction to MLOps, Levels of Automation
- 11:45 – 13:15 Experiment Tracking and Model Deployment. MLOps Best Practices
- 14:30 – 16:00 Laboratory Work
- 16:00 – 17:00 Laboratory Work. Discussion
- 17:00 – 18:00 Motivational Meeting

Day 6

- 10:00 – 16:00 Closing of the Summer School. Team Building. Networking
